

KAREN SANCHEZ | FULL STACK WEB DEVELOPER

OBJECTIVE

Searching for a Jr. Web Developer position in a company that prioritizes beautiful design and usefulness while encouraging creative thinking and problem solving.

PROJECTS

FLIPSIDE NEWS

By using the Nokogiri Ruby gem a topic of choice is scraped from various news websites and then rendered side by side to compare opposing viewpoints on the selected topic.

PLAN MY MEAL

App built on Node.js, Angular, and Express. Where to eat for the day should not be a hard decision to make. Use PMM and go!

JAVASCRIPT TUTORIAL

I was never fond of JavaScript, so I decided that in order to help others like me I'd make a tutorial for beginners. I learned a lot about Bootstrap and responsive grid systems along the way.

SKILLS

HTML5	jQuery	Express	Node.js
CSS	SASS	JavaScript	Rails
JavaScript	D3.js	Ruby	Git
