KAREN SANCHEZ | FULL STACK WEB DEVELOPER

OBJECTIVE

Searching for a Jr. Web Developer position in a company that prioritizes beautiful design and usefulness while encouraging creative thinking and problem solving.

PROJECTS

Plan My Meal: App built on Node.js, Angular, and Express. Where to eat for the day shouldn't be a time-consuming decision to make. Use PMM and go! Made with the idea that couples have a hard time choosing their next meal together.

JavaScript Tutorial: From data types to control structures, this tutorial is aimed to help beginners get a better idea about programming.

Flipside News: Rails website that compares two opposing sides of a news story. Nokogiri gem was used to scrape web data from internet news sources. Both articles would render side by side for comparison.

SKILLS

HTML5	JavaScript	Rails	Bootstrap
CSS	jQuery	Express.js	Sinatra
SASS	Ruby	Heroku	Git

EDUCATION

NEW YORK CODE + DESIGN ACADEMY
Full Stack Web Development 2016
